UID EX 9

AIM:

The aim is to design input forms that validate data, such as email and phone number, and display error messages using HTML/CSS and JavaScript with Validator.js

PROCEDURE:

Step 1:

Setting Up the HTML Form Start by creating an HTML form with input fields for the email and phone number.

```
<!DOCTYPE html>
<html>
<head>
<title>Elegant Form</title>
<link rel="stylesheet" href="style4.css">
</head>
<body>

<div class="container">
<h2>Create Account</h2>

<form id="form4">
<div class="input-group">
<input type="text" id="name4" required>
<label>Name</label>
</div>

<div class="input-group">
<input type="email" id="email4" required>
<label>Email</label>
```

```
<small id="emailError"></small>
</div>

<div class="input-group">
<input type="text" id="phone4" required>
<label>Phone</label>
<small id="phoneError"></small>
</div>

<button type="submit">Submit</button>
<p id="successMsg"></p>
</form>
</div>

<script
src="https://cdnjs.cloudflare.com/ajax/libs/validator/13.9.0/validator.min.js
"></script>
<script src="script4.js"></script>

</body>
</html>
```

Step 2:

Styling the Form with CSS Next, add some basic styling to make the form look nice.

```
body {
    font-family: 'Segoe UI', sans-serif;
```

```
    background: #0f172a;
    display: flex;
    justify-content: center;
    align-items: center;
    height: 100vh;
    color: white;
}

.container {
    background: #1e293b;
    padding: 30px;
    border-radius: 15px;
    width: 320px;
    box-shadow: 0 0 20px rgba(0,0,0,0.5);
}

h2 {
    text-align: center;
}

.input-group {
    position: relative;
    margin: 20px 0;
}
```

```
.input-group input {
    width: 100%;
    padding: 10px;
    background: transparent;
    border: 1px solid #555;
    color: white;
    outline: none;
}

.input-group label {
    position: absolute;
    top: 10px;
    left: 10px;
    color: #aaa;
    transition: 0.3s;
}

.input-group input:focus + label,
.input-group input:valid + label {
    top: -10px;
    font-size: 12px;
    color: #38bdf8;
}
```

```
small {
    color: red;
    font-size: 12px;
}

button {
    width: 100%;
    padding: 10px;
    background: #38bdf8;
    border: none;
    color: black;
    font-weight: bold;
    cursor: pointer;
    border-radius: 5px;
}

#successMsg {
    text-align: center;
    margin-top: 10px;
    color: lightgreen;
}
```

Step 3:

Adding JavaScript for Validation Finally, add JavaScript to validate the input fields using

Validator.js and display error messages `const emailInput = document.getElementById("email4");`

```
const phoneInput = document.getElementById("phone4");

emailInput.addEventListener("input", () => {
    const emailError = document.getElementById("emailError");

    if (!validator.isEmail(emailInput.value)) {
        emailError.textContent = "Invalid email format";
    } else {
        emailError.textContent = "";
    }
});

phoneInput.addEventListener("input", () => {
    const phoneError = document.getElementById("phoneError");

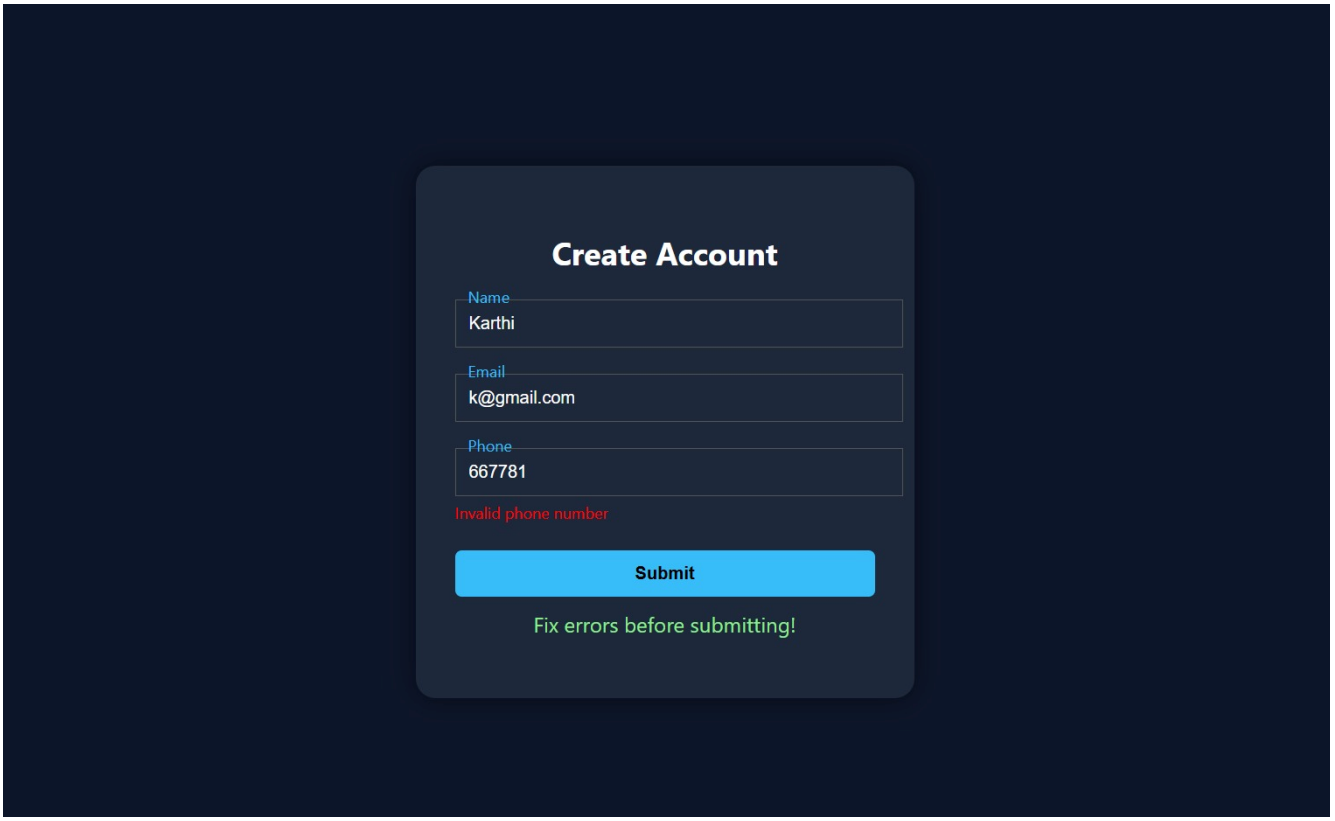
    if (!validator.isMobilePhone(phoneInput.value, 'en-IN')) {
        phoneError.textContent = "Invalid phone number";
    } else {
        phoneError.textContent = "";
    }
});

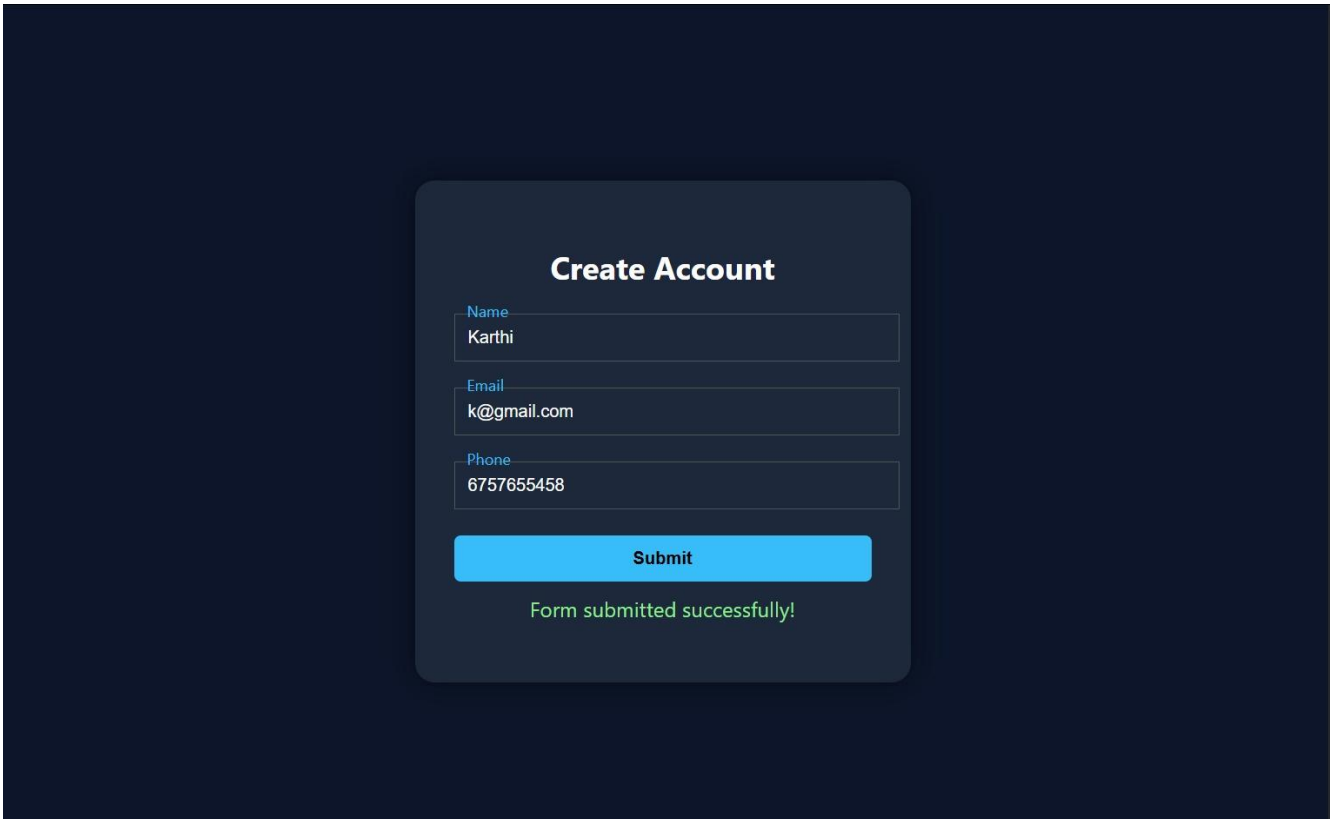
document.getElementById("form4").addEventListener("submit",
function(e) {
    e.preventDefault();
```

```
    const email = emailInput.value;
    const phone = phoneInput.value;
    const successMsg = document.getElementById("successMsg");

    if (
        validator.isEmail(email) &&
        validator.isMobilePhone(phone, 'en-IN')
    ) {
        successMsg.textContent = "Form submitted successfully!";
    } else {
        successMsg.textContent = "Fix errors before submitting!";
    }
});
```

OUTPUT





Create Account
Name
Karthi
Email
k@gmail.com
Phone
6757655458
Submit
Form submitted successfully!
