EXPERIMENT 4

USER INTERFACE DESIGN

ROLL NO:240701231 NAME: KARTHICK K

AIM:

Create a prototype with familiar andun familiar navigation elements. Evaluate ease of use with different user groups using proto.io

Screen 1-Welcome Screen

Familiar Elements:

1. **“Get Started →” Button (Call-To-Action)**

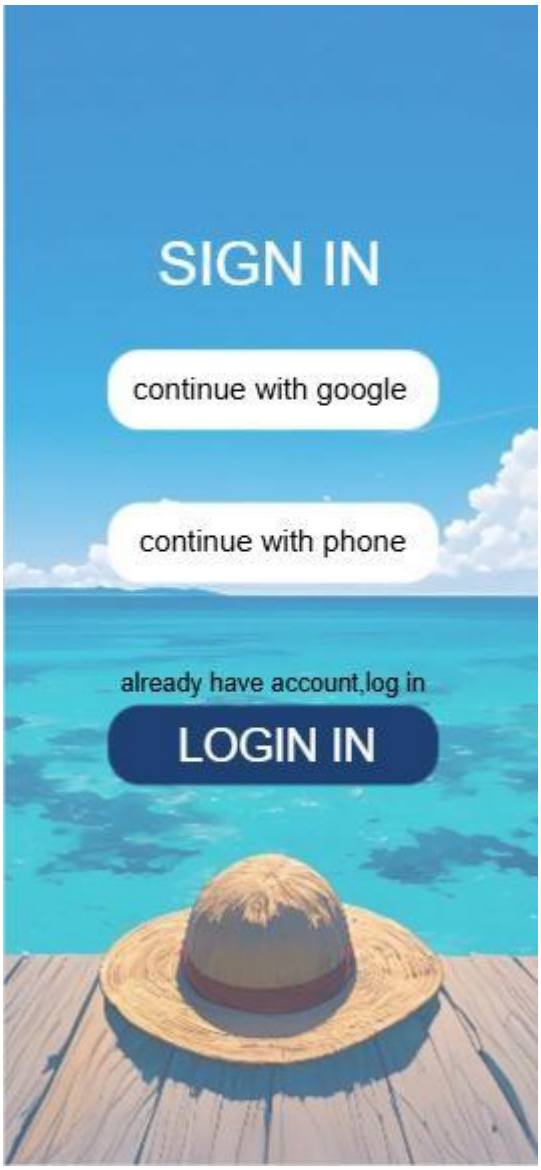
- A widely used CTA button in mobile applications.
- Clearly indicates the next step in the user journey.
- The arrow symbol (→) suggests forward navigation.
- Clicking it will likely take the user to the Sign In / Login page.

2. **Promotional Text: "1000+ animes here watch now"**
    - A common marketing tagline.
    - Highlights content availability to attract users.
    - Users are familiar with such promotional headlines in streaming apps.
3. **Character-Based Background Image**
    - Large visual banner (anime character).
    - Common in entertainment/streaming apps.
    - Helps immediately communicate the app's theme (Anime content).

Possibly Unfamiliar Elements:

1. **Overlay Transparent Card Design**
    - The text and button are placed inside a semi-transparent box.
    - Some users may not immediately recognize it as an interactive section.
    - Could be improved with stronger contrast for accessibility.
2. **No Back or Skip Option**
    - Users cannot directly navigate backward from this page.
    - First-time users may expect a "Skip" or "Login" shortcut.

Screen 2-login options Screen:



Familiar Elements:

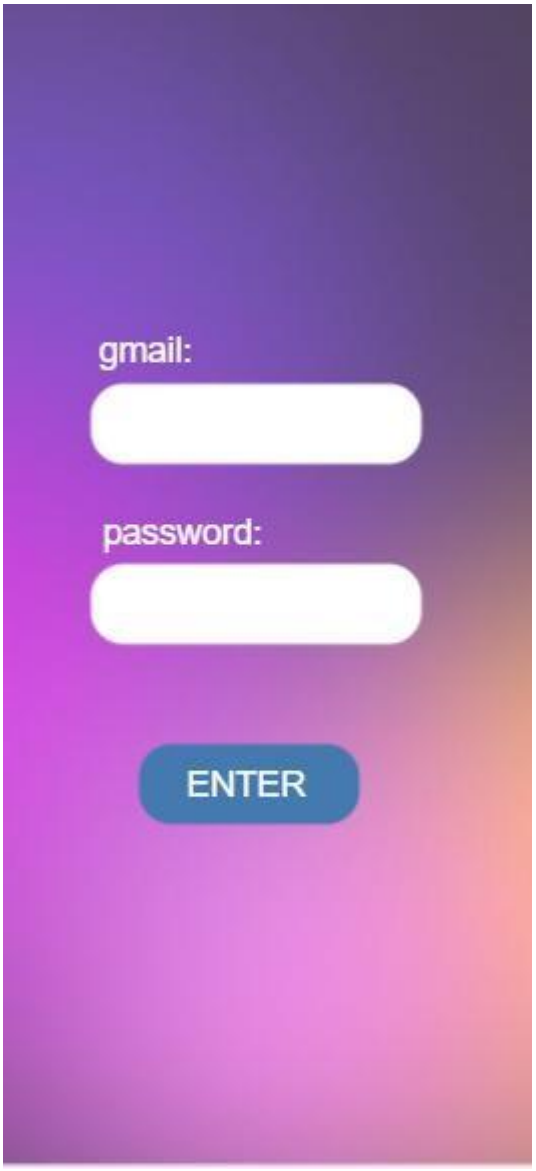
1. **“Continue with Google” Button**
    - A widely recognized authentication method.
    - Users are familiar with Google-based login in most modern apps.
    - Clicking it redirects to Google authentication.
2. **“Continue with Phone” Button**
    - Common in apps requiring OTP verification.
    - Users expect SMS-based verification.

Possibly Unfamiliar Elements:

1. **Text: “already have account, log in”**

- Placement may confuse some users if it is not clearly clickable.
- Needs better visibility for clarity.

Screen 3: Gmail & Password Login Page



familiar Elements:

1. **Gmail Text Field**
   - Standard input field for email address.
   - Users are very familiar with email-based login.
2. **Password Text Field**
   - Common secure input field.

- Usually masked for privacy.

3. **ENTER Button**
    - Standard CTA for authentication.
    - Clicking logs user into the app.

Possibly Unfamiliar Elements:

1. **Gradient Background**
    - Not a navigation element.
    - Purely aesthetic and may not indicate function.

Screen 4: Home / Menu Page:

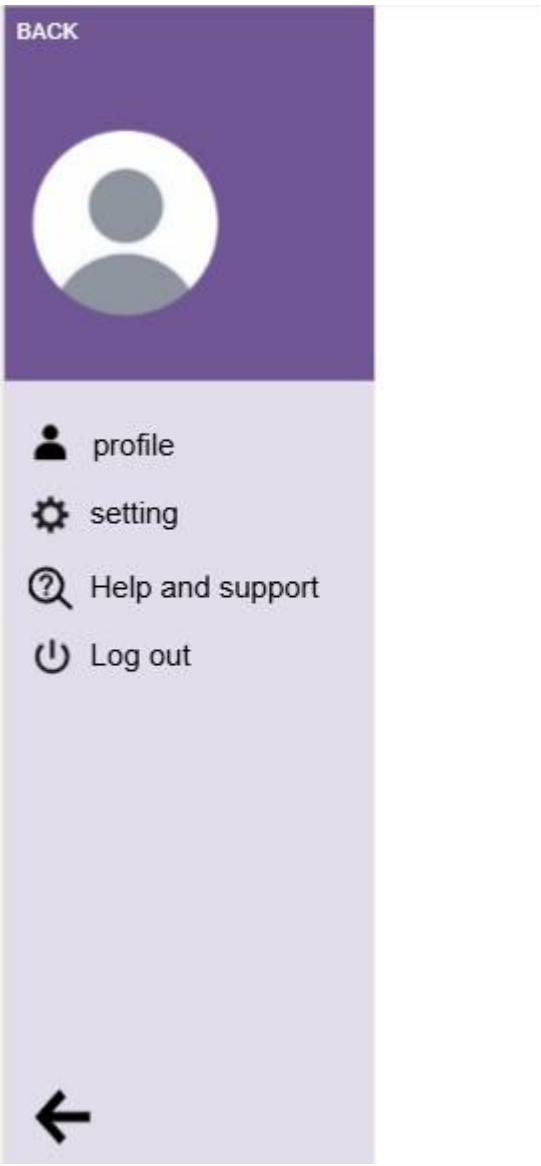
Familiar Icons:

1. **Notification Bell Icon – Top Right**
    - Universally used for notifications.
    - Clicking opens alerts or updates.
2. **Profile Icon – Top Right**
    - **Represents user account.**
    - **Clicking opens profile or settings.**
3. **Search Bar (Icon Inside)**
    - **Widely recognized search functionality.**
    - **Users can type anime names.**
4. **"See More" Text**
    - **Common UI element for expanding category content.**
    - **Clicking shows additional items.**

Possibly Unfamiliar Elements:

1. **Category Labels (ACTION, ADVENTURE, ROMANCE)**
    - **Familiar in entertainment apps.**
    - **But placement with horizontal layout may require scrolling awareness.**

Screen 5: Sidebar Navigation Menu



Familiar Icons:

1. **Profile Icon (Top Circle Avatar)**
    - **Represents user account.**
    - **Clicking may allow editing profile.**
2. **Settings Icon**
    - **Universal symbol for app settings.**
    - **Clicking opens configuration options.**
3. **Help and Support Icon**
    - **Standard help center symbol.**
    - **Users expect FAQs or support**

Possibly Unfamiliar Elements:

1. **“BACK” Text at Top**
    - **Redundant if arrow is already present.**
    - **Could confuse some users.**
